

# TheCloud Hosted Exchange: the latest in exchange email technology

TheCloud Exchange delivers the very latest technologically email platform on the market (Microsoft Exchange 2010). Accessed from our central core, your customers can see their email wherever they might be, allowing them to respond to the demands of the modern world.

## Advanced security

TheCloud Exchange combines built-in anti-spam and encryption technologies with an advanced anti-virus infrastructure for efficient management of a wide range of security threats businesses face today.

## TheCloud Web Application

TheCloud Exchange has a built in Web Application helping users to be more efficient and productive across platforms and locations, providing them access to email, voicemail, instant messaging and text messages.

## Mobile Sync

TheCloud Exchange offers ActiveSync /Direct Push to mobile devices. Users can access a universal inbox with email, voicemail, rights-protected messages and instant message conversations.

## Email archiving retention and discovery

TheCloud Exchange service can offer built-in integrated email archiving, retention and discovery capabilities of emails, simplifying the process of preserving business communications.

## Information protection and control

TheCloud Exchange tools monitor sensitive content in emails and controls accidental and unauthorised distribution. These tools include automated alerts about organisational policies and rules that block, redirect, encrypt and modify messages.

## Voicemail with Unified Messaging

Your customers can benefit from single inbox access to voicemail and email through TheCloud Exchange, enabling both systems to be managed from a single platform. Voicemail messages appear as both text and audio for added productivity.

## Deployment flexibility

Deployed from within our core cloud environment, TheCloud Exchange enables your customers to save on upfront IT infrastructure costs and helps meet regulatory requirements.
