

Voice-over-IP: feature rich business communications

At TheCloud we provide you with the means and support to implement a flexible Voice-over-IP (VoIP) business communications solution through feature rich SIP trunking.

SIP provides all the inbound and outbound telephony features your customers require to enhance their business and customer service operations, with the additional benefits of rapid divert and mobility options to ensure business continuity.

Benefits of VoIP via SIP

- Flexible numbering
- Multiple site integration including internationally
- Free calls between connected sites
- Reduced outbound call costs
- Resilient business continuity and disaster recovery solution
- Scalable on a per channel basis
- Supports application convergence
- Offers full emergency services support
- Inbuilt anti-toll fraud

More than just a telephony provider

Here at TheCloud we don't just help you supply business telephone systems. Together with our voice, connectivity and networking options, we help you provide unified communications creating partnerships with you and your business customers.

We empower you to become a highly agile machine, accessing the latest technology without the burden of infrastructure and software costs.

Call us today to start your journey as a Reseller.
